

VB AMP ENCLOSURE™

CRANK IT UP!

You're in control with a VB Amp Enclosure™.

The VB Amp Enclosure™ allows you to record or practice your amplified instruments without sacrificing volume. Each enclosure includes a convoluted foam interior, heavy fabric exterior, cable porting, the VB Iso Pad™ and is available in four sizes with room for your microphone. Turn it up and get the tones you crave.

Four Sizes in Two Series

To accommodate just about any amp on the market, VB Amp Enclosures™ are available in four sizes in two different series. The VB Amp Box™ includes ventilation and is recommended for combo amps. The VB Speaker Box™ does not include ventilation and is recommended for speaker cabinets only.

- Eliminates the ear blistering levels needed to capture the natural sounding distortion and overdrive produced by the speaker of a loud guitar amp.
- Eliminates interference and the possibility of unexpected background noises affecting the recording of guitar tracks or other instruments.
- Makes a perfect late night practice speaker cabinet—you get the sound and feel of your live rig but at a level not much louder than a practice amp. Keep your neighbors happy.
- Provides a quiet rehearsal solution for any amplified band.

"The box-in-a-box design with its additional isolation properties was a good call. My guitar cab pumps out prodigious bass frequencies, and the extra mass of this beefed up VB Speaker Box™ is working quite well to dampen the thunder. In short, even though I live in an apartment, I've finally been able to obtain the kind of impressive recording results I've been seeking for a long, long time. The dual doors design is the way to go—the epitome of convenience and functionality. Thanks for a great product!"

Ron Anderson

"This unit is AMAZING".

Doug Doppler, GetKillerTone.com

"The VB Amp Enclosure™ allows us to control the volume. We are thrilled with the improvement it has made to our worship environment."

**Chip Demetri, Worship Leader,
Norkenzie Christian Church**

"I set up the VB Amp Enclosure™ in the studio and it is working out great. My neighbors don't even know what's happening."

Richard Noriega
