

WHAT HAPPENS IN YOUR VOCALBOOTH™ STAYS IN YOUR VOCALBOOTH™

VOCALBOOTH.com™
HEAR THE DIFFERENCE

RECORDING Rehearsing PRODUCING

Crank it up. It's all good when you have a VocalBooth™. Professional and home recording artists, serious studio musicians and producers, as well as audio post production technicians rely on their VocalBooth™ to get the sound quality they need. Whether you're recording, rehearsing, tracking, mixing or overdubbing we have a VocalBooth™ that is right for you.

VB Platinum Series™

Recommended for those who want significant sound isolation, the double-wall VB Platinum Series™ with acoustic fabric wrapped interior is our premium sound reduction VocalBooth™. Choose the size you need—for vocals a 4'x6' may be right but to give you the elbow room you need, for multiple musicians or a full drum set, the VB Platinum Series can be increased up to a 16'x16'. The VB Platinum Series' unique sub-floor acts as a separator between the booth and the preexisting room for reduced low frequency reverberation. Add a window for clear communication between talent and engineer.

4'x6' VB Gold Series VocalBooth™ for
vocal tracking

Legendary recording artist and per-
former, as well as Dancing with the
Stars winner

BROADCAST Voice Over FILM & TELEVISION

Can you hear me now? VocalBooths™ are in some of the most discriminating newsrooms, film sets and voice over studios all over the world. Modular and portable by design makes the VocalBooth™ an asset that can be moved, rearranged and upgraded when you need it. Sizing options are offered to accommodate large groups for broadcasts and podcasts, as well as various acoustic treatment choices to keep the good sounds in and the bad sounds out.

VB Diamond Series™

Designed to utilize the corner of a room—the pentagonal shaped VB Diamond Series™ has been a good choice for our clientele of broadcasters, voice over artists and film and television producers and sound mixers. As with all our VocalBooths™, you have the ability to access your broadcast or podcast computer through one of the cable ports while your monitor and keyboard are stationed inside your booth.

Add a window for a clear view to your engineer or for just additional light. The Vent Silencer upgrade reduces the already quiet ventilation to a minimum for superior voice casting.

*Custom 14 Carat Platinum
Diamond Series VocalBooth™*

Moody Radio

12' x 16' and 12' x 14' VB Gold Series VocalBooths™ used as a control room and live room.

Compelling programming filled with solid biblical insight broadcast internationally. Part of the Moody Bible Institute of Chicago.

Emmy award winning production sound mixer for film and television shows, including Scrubs, Cougar Town, Marley and Me, Castle and Miami Vice

SCIENCE & EDUCATION

Government

Audiology

Custom 4' x 6' Gold Series
VocalBooth™ with Auralex

Shhhhhh. Quiet please. You've said that a million times, right? Not anymore when you have a VocalBooth™. Whether your sound reduction needs are for scientific testing, super secret conferencing or your new audiology office our VocalBooths™ are designed to do the job you need. We have provided booths for an array of businesses and institutions, including government agencies, churches and universities in the US and abroad. The applications are as diverse as our client list. We've had clients purchase a VocalBooth™ just to get some shut-eye. (Those tend to be the ones in the heart of Manhattan.)

VB Gold Series™

Our most popular VocalBooth™ for just about any professional situation, the VB Gold Series™ is a single-wall design but with an added ½" absorption material for greater sound control. You get versatility with this model—the size can be modified larger or smaller and the VB Gold Series can be upgraded to the VB Platinum Series model.

Butler University

7' x 13' custom VB Platinum Series VocalBooth™ and multiple VB Amplifier Enclosures for rehearsing and recording

St. Thomas Aquinas Catholic Church, Madison, Wisconsin

Two 12' x 12' VB Gold Series VocalBooths™ for rehearsing and recording

Andrews Air Force Base

UPGRADES

Sizes colors

Choose the VocalBooth™ that's right for you. Our four models offer different levels of performance and options to meet your sound control requirements, as well as budget. Models available in a single or double-wall design with sizes ranging from 4'x4' to 16'x16'. Our VB Diamond Series™, the original pentagonal shaped booth, is designed to utilize a corner of a room and is available in four space saving sizes. VocalBooths™ are easy to assemble and do not require any special skills or tools. Some can be assembled in less than an hour. Whew, that's fast.

THE MISSING LINK— high quality sound isolation.

We understand. You want great results whether you're doing professional or amateur home-based recording and broadcasting. We've been building and selling VocalBooths™ since 1997 to an array of satisfied, often repeat customers—everyone from the most successful in their field, including chart topping recording artists and Grammy winning producers to the up-and-coming garage band musicians and amateur voice over artists. Today you can find a VocalBooth™ in most countries around the world. In university rehearsal rooms and broadcasting departments, churches, government agencies, science labs, audiology offices and film and television studios.

We are a small manufacturing company based in the Cascade Mountains of Central Oregon. Our employees are dedicated, diverse and talented with a spirit as unique and strong as the West. What sets us apart from our competition is not only our state-of-the-art sound rooms that exceed expectations but our reputation of an unwavering commitment to provide the highest standard of customer service in the industry. We make it right for you. We listen to what you need and we find your solution.

A Sound Solution.

A VocalBooth™ can operate as an external, standalone sound isolation solution or as an additional recording space for a studio without compromising the sound you need. How about portability and modular too, not to mention affordable? Your VocalBooth™ becomes an asset unlike a hard built booth. Move it across the room or across the world. It can go where you go—easily.

Many models can be expanded or reduced, slimmed down or tricked out. You get what you need—no more, no less. We build to fit your need and budget without compromising quality. That's our promise.
